

Oncidium
foundation

**A non-profit organization
committed to global
advancement of radioligand
therapies for cancer care,
endeavoring for healthcare
equity regardless of origin or
financial situation.**

Recognizing Our Committed Philanthropists

The Oncidium foundation would not be able to accomplish its mission without the generosity of its supporters. We would like to show our deep appreciation to our initial benefactors that believed in the foundation, enabling the shift from “a cutting-edge idea” to a concrete and active organization.

“ *As the field of nuclear medicine grows in importance, there is a need for patient advocacy groups that are able to build awareness and connect patients to treatment options. This visionary idea motivated me to become an early participant in the creation of the foundation.*

”

Dr. Christian Behrenbruch
Co-founder, MD and CEO
at Telix Pharmaceuticals

“ *Observing the global momentum of radionuclide therapy, I felt the need to support the Oncidium foundation, as it strives to bridge gaps for a broader understanding of the existence and benefits of such options and brings us closer to our shared goal.*

”

Dr. Andreas Kluge
Owner, ABX-CRO advanced
pharmaceutical services and
Pharmaceuticals Consultant

About the Foundation

Advancing Global Access to Radioligand Therapy for Cancer Care

As a recent approach in cancer diagnosis and therapy, there is still a lot to do to bring forward the availability and potential of radioligand therapy.

Created in 2011, the Oncidium foundation is a non-profit organization dedicated to advancing nuclear medicine therapies, enhancing patient access, financing treatments for those in need, and supporting vital research programs.

“ Progresses made in radioligand therapy over the last few years have shown incredible results. My main wish is to make this technology available for the largest number of patients. ”

Access

Improve access to cancer treatments and clinical trials

Education

Promote precision targeted radioligand therapy

Hope

Support the development of radioligand therapy

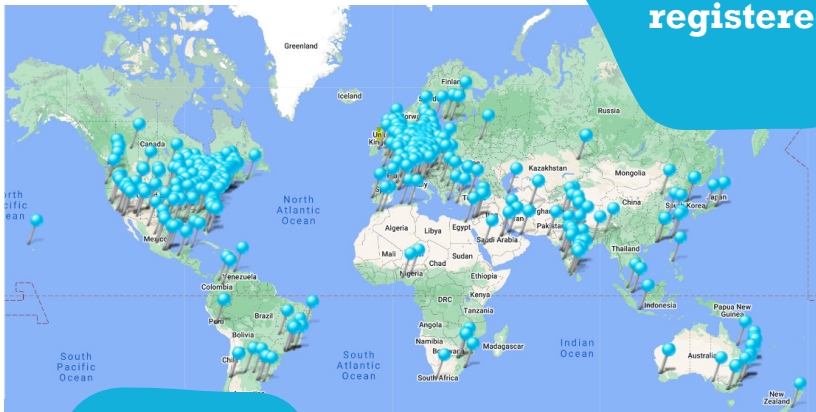

Enhancing Access

The Oncidium foundation aims to make radiotherapeutics available for as many people as possible. Therefore, efforts are concentrated towards improving patient access to cancer treatments and clinical trials.

An effective platform is available on the foundation's website for:

- patients
- practitioners
- experts in radiotherapeutics

**600+ therapy
centers
registered**

Help cancer patients locate the nearest therapy center and assess if they are potential candidates for radioligand therapy.

To register your center:

www.ovidiumfoundation.org/register

Ambassadors Network

Global Perspective, Local Actions

The foundation brings together a wide network of Ambassadors from all around the world.

These theranostics experts and enthusiasts exchange ideas, share their projects, visions, and aspirations for the work of the foundation locally and globally, to further support the development of radioligand therapy for cancer care.

Advancing Education and Building Awareness

The Oncidium foundation is a worldwide hub connecting patients, practitioners and experts in the nuclear medicine field. Education and awareness are key to provide a better understanding of how radiotherapeutics work and their benefits for cancer care, and thus, to further support the development of personalized medicine.

Bringing Hope

The Oncidium foundation is driven by the long-term vision of improving lives globally.

Bringing hope:

- for patients, when other options have failed
- by financing treatment for patients that are not able to afford therapy costs
- by supporting projects and research to develop radioligand therapy availability and access around the world.

**Nobody
left behind**

The NOBLE Registry is an international clinical collaboration supported by Telix Pharmaceuticals and the Oncidium foundation for the development of ^{99m}Tc -iPSMA* SPECT imaging to detect prostate cancer recurrence and metastases.

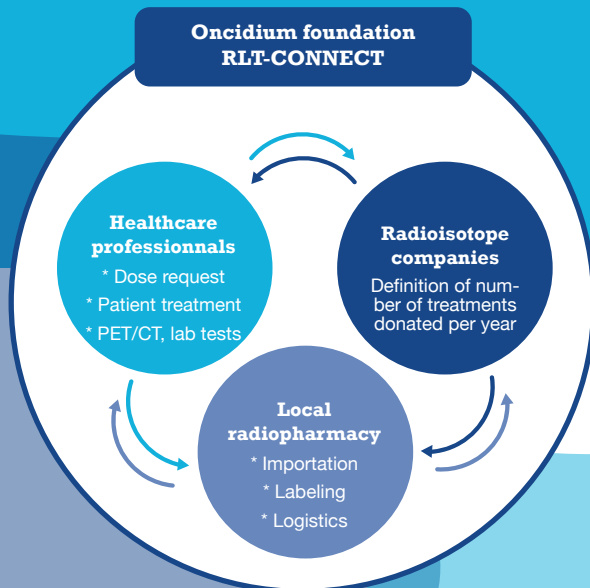

The NOBLE Registry aims to enable people living with prostate cancer to access accurate diagnosis and further treatment planning.

* ^{99m}Tc -iPSMA is authorised for investigational use only.

RLT-Connect Platform

Recognizing the disparities in access to innovative cancer therapies in low- and middle-income countries, the Oncidium foundation is launching the RLT-Connect Platform.

This new initiative serves as a bridge, connecting healthcare practitioners and leading medical radioisotope companies, to facilitate and provide treatment doses to patients who could benefit from these life-saving radioligand therapies.

CONNECT - JOIN - DONATE

This initiative saved my life

“When I found out about the Lutetium treatment, I did not care that it was impossible!”

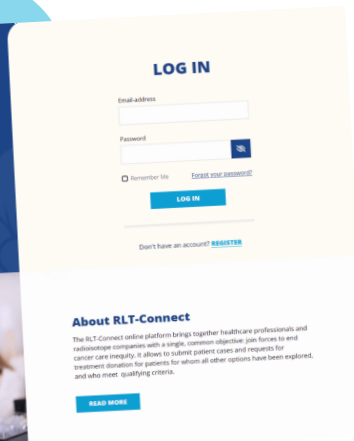

Dr. Fernando Acosta

target
365
lives
WITH RLT-CONNECT

The destination

Providing an increased number of doses over the years, with an ambitious objective capable of mobilizing all project stakeholders: helping **365 lives over the next five years**, thus providing **2000 doses**.

About RLT-Connect

The RLT-Connect online platform brings together healthcare professionals and radioisotope companies with a single, common objective: join forces to end cancer care inequality. It allows to submit patient cases and requests for treatment duration for patients for whom all other options have been explored, and who meet qualifying criteria.

Donate and Make an Impact

At the Oncidium foundation, we are on a mission to transform cancer care and improve patient outcomes worldwide. We believe that, together, we can make a profound impact on the lives of countless individuals battling cancer. Your contribution can play a pivotal role in achieving this vision.

How can
you
donate?

Why Donate to the Oncidium Foundation?

Global Impact

Support research, education, and initiatives benefiting patients worldwide.

Community Engagement

Demonstrate corporate social responsibility by engaging your community, employees, and stakeholders meaningfully.

Positive Recognition

Your generosity is acknowledged through featured recognition on our website, social media, and events.

Every project we undertake has a patient-centered focus and every donation directly contributes to improving patient access to life-saving treatments.

Together, we are creating a future where cancer care is more available, accessible, and affordable, worldwide.

Your donation may be eligible for tax deductions. Please contact us.

Our Goals:

- Enhance patient access
- Accelerate clinical developments
- Finance cancer treatments
- Increase partnerships
